

SHIFT  UP™

For Superior Software Development

Welcome to ShiftUp™, Octo's modular, open source platform for building a modern, secure, scalable, and automated Digital Software Supply Chain. ShiftUp brings technology, people, and processes together for superior development results that advance your missions faster and at less cost.

The Best Minds Built In

When it comes to DevSecOps, we shifted left years ago, incorporating human-centric design, continuous testing to remove defects, and bolstered security throughout our Continuous Integration/Continuous Delivery processes. From our decades of experience serving Federal Government agencies, we know what works and what doesn't. So, we've gone further, building the knowledge from the best minds of the industry into ShiftUp's automated features. **Your agency benefits from nearly instant Infrastructure as Code and DevSecOps ramp-up, no expensive hires necessary.**

Make the Shift

- Agile development processes with inflight certification
- Pre-configured, integrated DevSecOps pipeline tooling
- Fully hardened, certified containerized Kubernetes infrastructure
- Continuous infrastructure security
- Verified, secured software resource management
- Dashboards to measure progress and performance down to the developer level

Take What You Need

Not every project will require every feature, which is why we built ShiftUp to be flexible and customizable.

Features

METRO

An Agile-guided development framework, Metro brings Human Centered Design, Agile best practices, and behavior and feature driven development to your projects.

JAVANASM

A managed, containerized infrastructure, JavanaSM allows portability of modern software solutions across cloud and hybrid environments while using fewer resources with higher utilization.

OPTIC

DevSecOps as a service, OPTIC brings trunk based development and continuous integration and continuous delivery/deployment (CI/CD) with the security of constant scanning and testing.

CONDUIT

A secure, cloud agnostic, industry standards based, scalable, and performant product that prevents vendor lock-in.

No matter what stage of development your teams are in, ShiftUp can drive your organization to a more mature Agile and DevSecOps environment that supports greater efficiencies at the least cost.

Give Us Eight Minutes

Ready to see how fast we can get your development teams up and ready? Give us eight minutes to show you a demo.
